Agile software development is an approach to software development under which requirements and solutions evolve through the collaborative effort of self-organizing and cross-functional teams and their customer(s)/end user(s). It advocates adaptive planning, evolutionary development, empirical knowledge, and continual improvement, and it encourages rapid and flexible response to change.

Agile software development - Wikipedia

Many people have asked us to share our run sheets and material for the self-selection sessions we have run during the past years. So, by popular demand here's our self-selection pocket guide:
