Logical Observation Identifiers Names and Codes (LOINC) is a database and universal standard for identifying medical laboratory observations. First developed in 1994, it was created and is maintained by the Regenstrief Institute, a US nonprofit medical research organization. LOINC was created in response to the demand for an electronic database for clinical care and management and is publicly ...

LOINC - Wikipedia

The functional limitation reporting (FLR) requirements are discontinued as of January 1, 2019, per the Centers for Medicare and Medicaid Services (CMS) final physician fee schedule ruling. One reason CMS gave for the decision was strong APTA regulatory and legislative advocacy efforts highlighting the heavy administrative burden despite little contribution to improved patient care.

Psychological testing is the administration of psychological tests, which are designed to be "an objective and standardized measure of a sample of behavior". The term sample of behavior refers to an individual's performance on tasks that have usually been prescribed beforehand. The samples of behavior that make up a paper-and-pencil test, the most common type of test, are a series of items.

Health literacy is the degree to which individuals have the capacity to obtain, process, and understand basic health information and services needed to make appropriate health decisions. AHRQ-funded researchers have developed four tools to measure an aspect of health literacy—individuals' reading comprehension in a medical context. This page includes two new tools that allow direct ...
