

**applied multivariate statistical analysis pdf**

The general linear model or multivariate regression model is a statistical linear model. It may be written as  $Y = X\beta + \epsilon$ , where  $Y$  is a matrix with series of multivariate measurements (each column being a set of measurements on one of the dependent variables),  $X$  is a matrix of observations on independent variables that might be a design matrix (each column being a set of observations on one of the ...

**General linear model - Wikipedia**

There has been a significant advancement in the application of statistical tools in plant pathology during the past four decades. These tools include multivariate analysis of disease dynamics involving principal component analysis, cluster analysis, factor analysis, pattern analysis, discriminant analysis, multivariate analysis of variance, correspondence analysis, canonical correlation ...
