

bayesian networks in educational pdf

Netica APIs (Application Programmer Interfaces) The Netica APIs are a family of powerful Bayesian Network toolkits. They allow you to build your own Bayesian belief networks and influence diagrams, do probabilistic inference, learn nets from data, modify nets, and save and restore nets.

Roger Levy's Papers Page

Deep learning (also known as deep structured learning or hierarchical learning) is part of a broader family of machine learning methods based on learning data representations, as opposed to task-specific algorithms. Learning can be supervised, semi-supervised or unsupervised.. Deep learning architectures such as deep neural networks, deep belief networks and recurrent neural networks have been ...

A Hopfield network (HN) is a network where every neuron is connected to every other neuron; it is a completely entangled plate of spaghetti as even all the nodes function as everything. Each node is input before training, then hidden during training and output afterwards. The networks are trained by setting the value of the neurons to the desired pattern after which the weights can be computed.

The Neural Network Zoo - The Asimov Institute

In recent years, deep artificial neural networks (including recurrent ones) have won numerous contests in pattern recognition and machine learning.
