Computational science and engineering is the confluence where computers integrate with other scientific disciplines. The concepts and terminology of high performance distributed scientific ...

(PDF) Computational Science and Engineering.

Encompasses the full range of computational science and engineering from modelling to solution, both analytical and numerical. It develops a framework for the equations and numerical methods of applied mathematics. Gilbert Strang has taught this material to thousands of engineers and scientists (and many more on MIT's OpenCourseWare 18.085-6).
