Value at Risk Analysis of a Bank's Balance Sheet

Equation. A general water balance equation is: $P = E + S + \Delta S$ where P is precipitation, E is evapotranspiration, S is streamflow, and ΔS is the change in storage (in soil or the bedrock / ground water). This equation uses the principles of conservation of mass in a closed system, whereby any water entering a system (via precipitation), must be transferred into either evaporation, surface runoff (eventually reaching the ...

A currency crisis is a situation in which serious doubt exists as to whether a country's central bank has sufficient foreign exchange reserves to maintain the country's fixed exchange rate. The crisis is often accompanied by a speculative attack in the foreign exchange market. A currency crisis results from chronic balance of payments deficits, and thus is also called a balance of payments crisis.
