

nanotechnology for the life pdf

In the next 20 years, nanotechnology will touch the life of nearly every person on the planet. The potential benefits are mind boggling and brain enhancing. But like many of the great advancements in earth's history, it is not without risk Here are some of the risks posed to society by nanotechnology.

life could in the future be produced artificially by means of nanotechnology. If the difference between the objects of nanotechnology and those of living nature were to be dissolved, it would be the most fundamental conceivable change in the relationship between nanotechnology and nature (Section 5).
