A delusion is a mistaken belief that is held with strong conviction even in the presence of superior evidence to the contrary. As a pathology, it is distinct from a belief based on false or incomplete information, confabulation, dogma, illusion, or some other misleading effects of perception. They have been found to occur in the context of many pathological states (both general physical and ...

The particular focus of How Children Succeed was the role that a group of factors often referred to as noncognitive or "soft" skills " qualities like perseverance, conscientiousness, self-control, and optimism " play in the challenges poor children face and the strategies that might help them succeed. These qualities, which are also sometimes called character strengths, have in recent ...
