Open access (OA) refers to research outputs which are distributed online and free of cost or other barriers, and possibly with the addition of a Creative Commons license to promote reuse. Open access can be applied to all forms of published research output, including peer-reviewed and non peer-reviewed academic journal articles, conference papers, theses, book chapters, and monographs.

Millennials: Confident. Connected. Open to Change Executive Summary. Generations, like people, have personalities, and Millennials "the American teens and twenty-somethings who are making the passage into adulthood at the start of a new millennium" have begun to forge theirs: confident, self-expressive, liberal, upbeat and open to change.

Requests for Research It's easy to get started in deep learning, with many resources to learn the latest techniques. But it's harder to know what problems are worth working on. We're publishing a living collection of important and fun problems to help new people enter the field, and for enthusiastic practitioners to hone their skills.

Every piece of research contains data whether qualitative or quantitative. How that data is derived and used varies from case to case. With increasing time pressures and a need to validate assumptions, there is growing concern that sound ethics are seen as a luxury but as a recent discussion at IDS concluded, good data ethics are essential if research is to have meaningful impact on lives.
