A mobile operating system (or mobile OS) is an operating system for phones, tablets, smartwatches, or other mobile devices. While computers such as typical laptops are 'mobile', the operating systems usually used on them are not considered mobile ones, as they were originally designed for desktop computers that historically did not have or need specific mobile features.

Brushless Generators: Among the most common because of their inexpensive construction, brushless generators have the least reliable voltage control. Brushless generators can't react quickly to changing loads, either producing low power (a brownout) or high power. Fluctuations of this nature will cause voltage sensitive equipment like HMI lights to shut off, or will damage sensitive electronics.
