

pathophysiology of heat stroke pdf

With the influence of global warming, it is predicted that the incidence of heat stroke cases and fatalities will also become more prevalent. Behavioral responses are important in the management of temperature elevations and may provide clues to preventing the development of heat stroke.

Heat Stroke: Background, Pathophysiology, Etiology

National Stroke Association (NSA) was formed in 1984 to fill a void as the only national non-profit health care organization focusing 100 percent of its resources and attention on stroke. In its brief history, NSA has become a leading national resource on stroke and the driving force behind efforts to improve stroke prevention, treatment and rehabilitation.

We present a case of heat stroke (HS) and acute kidney injury (AKI) due to severe rhabdomyolysis in a 14-year-old previously healthy female patient. When she was practicing strenuous exercise she suffered acute seizures and high fever. These symptoms were followed by coma and multiple organ failure (MOF), which included AKI, encephalopathy, fulminant hepatic failure (FHF), and disseminated ...

Cocaine intoxication refers to the immediate and deleterious effects of cocaine on the body. Although cocaine intoxication and cocaine dependence can be present in the same individual, these syndromes present with

different symptoms.

Cocaine intoxication - Wikipedia

Hypothermia (core temperature $< 35.0\text{ }^{\circ}\text{C}$) and hyperthermia (core temperature $> 40.5\text{ }^{\circ}\text{C}$) are medical emergencies.. Severely hypothermic patients are at risk of cardiac arrhythmias, including atrial and ventricular fibrillation. The clinical feature that best differentiates heat stroke from heat exhaustion is a change in mental status.

Thermoregulatory disorders and illness related to heat and

Rationale: Accurate, appropriate, noninvasive vascular examinations require knowledge of sonography physical principles and instrumentation, hemodynamics and the pathophysiology and treatment of vascular disease. The application of this knowledge to standardized diagnostic test protocols, correlation of test data with other

National Education Curriculum

New daily persistent headache (NDPH) is a primary headache syndrome which can mimic chronic migraine and chronic tension-type headache. The headache is daily and unremitting from very soon after onset (within 3 days at most), usually in a person who does not have a history of a primary headache disorder.

Essential hypertension™ is high blood pressure for which there is no clearly defined aetiology. From a practical perspective, it is best defined as that level of blood pressure at which treatment to lower blood pressure results in significant clinical benefit—a level which will vary from patient to patient depending on their absolute cardiovascular risk...
