

### **polymer structure and practical pdf**

Subdisciplines. This science comprises three main sub-disciplines: . Polymer chemistry or macromolecular chemistry is concerned with the chemical synthesis and chemical properties of polymers.; Polymer physics is concerned with the bulk properties of polymer materials and engineering applications.; Polymer characterization is concerned with the analysis of chemical structure, morphology, and ...

Ionic polymer-metal composites consist of a thin ionomeric membrane with noble metal electrodes plated on its surface. It also has cations to balance the charge of the anions fixed to the polymer backbone. They are very active actuators that show very high deformation at low applied voltage and show low impedance. Ionic polymer-metal composites work through electrostatic attraction between the ...
