Yacht Design & Boat Building - Kasten Marine

1 SHEET + is an attempt to make a nice looking, good performing small boat out of a single sheet of plywood. With a 30" beam and a length of 88", the boat achieves 4 mph with a trolling motor. Of course it can be rowed and paddled too. Costing about \$100 to construct, and capable of a 6 foot 190 pound occupant, it can be many things to many people.

PORTABLE BOAT PLANS

Stitch and glue is a simple boat building method which uses plywood panels stitched together, usually with

copper wire, and glued together with epoxy resin. This type of construction can eliminate much of the need for frames or ribs. Plywood panels are cut to shape and stitched together to form an accurate hull shape without the need for forms or special tools.

Catamaran designs were not initially considered as an option for Farrier Marine, Inc, but a number of Farrier trimaran owners considering moving up to large catamarans have commented that the boats in general just did not perform well, or the building plans available were not very comprehensive.

CATAMARAN DESIGNS - Farrier Marine

Project Habakkuk or Habbakuk (a common misspelling) was a plan by the British during the Second World War to construct an aircraft carrier out of pykrete (a mixture of wood pulp and ice) for use against German U-boats in the mid-Atlantic, which were beyond the flight range of land-based planes at that time. The idea came from Geoffrey Pyke, who worked for Combined Operations Headquarters.
