Statistics are supposed to make something easier to understand but when used in a misleading fashion can trick the casual observer into believing something other than what the data shows. That is, a misuse of statistics occurs when a statistical argument asserts a falsehood. In some cases, the misuse may be accidental. In others, it is purposeful and for the gain of the perpetrator.

The history of statistics in the modern sense dates from the mid-17th century, with the term statistics itself coined in 1749 in Germany, although there have been changes to the interpretation of the word over time. The development of statistics is intimately connected on the one hand with the development of sovereign states, particularly European states following the Peace of Westphalia (1648 ...

This seminar is designed to be an experimental and hands-on approach to applied chemistry (as seen in cooking). Cooking may be the oldest and most widespread application of chemistry and recipes may be the oldest practical result of chemical research. We shall do some cooking experiments to illustrate some chemical principles, including extraction, denaturation, and phase changes.

Test Statistics The stats program works out the p value either directly for the statistic you're interested in (e.g. a correlation), or for a test statistic that has a 1:1 relationship with the effect statistic. A test statistic is just another kind of effect statistic, one that is easier for statisticians and computers to handle. Common test statistics are t, F, and chi-squared.
