Chapter 1

MATLAB is an abbreviation for "matrix laboratory." While other programming languages usually work with numbers one at a time, MATLAB ® operates on whole matrices and arrays. Language fundamentals include basic operations, such as creating variables, array indexing, arithmetic, and data types.

Language Fundamentals - MATLAB & Simulink

Logo is an educational programming language, designed in 1967 by Wally Feurzeig, Seymour Papert, and Cynthia Solomon. Logo is not an acronym: the name was coined by Feurzeig while he was at Bolt, Beranek and Newman, and derives from the Greek logos, meaning word or thought.. A general-purpose language, Logo is widely known for its use of turtle graphics, in which commands for movement and ...

Logo (programming language) - Wikipedia

This free book teaches the basics of C++ programming in an easy-to-follow style, without assuming previous experience in any other language. A variety of examples such as game programming, club membership organization, grade tracking and grade point average calculation, make learning C++ both fun and practical. Each chapter contains at least one complete, fully functional example program, with ...

Fundamentals of Programming C++ - Free Computer

- When you're learning a new programming language, it's easy to get caught up in the details like syntax, and lose focus on the underlying concepts. Why do programming languages have a variety of data types? And what's the best approach and language to use for solving the task at hand? I'm Barron Stone and I've spent enough time bouncing between programming languages to know there are more ...
