Project Magnet was an unidentified flying object (UFO) study programme established by Transport Canada on in December 1950 under the direction of Wilbert Brockhouse Smith, senior radio engineer for Transport Canada's Broadcast and Measurements Section. It was formally active until mid-1954 and informally active (without government funding) until Smith's death in 1962.

Permanent magnets are magnets that permanently retain their magnetic field. This is different from a temporary magnet, which usually only has a magnetic field when it is placed in a bigger, stronger magnetic

field, or when electric current flows through it. The bar magnet and paper clips from Figure 9 are examples of permanent and temporary magnets, respectively.
