Connecting network drive and printer. net use can control mounting ("mapping" in Microsoft terminology) drive shares and connecting shared printers in a network environment. This command makes use of the SMB (server message block) and the NetBIOS protocol on port 139 or 445. The basic Windows XP configuration enables this functionality by default.

net use - Wikipedia

In computing, XCOPY is a command used on IBM PC DOS, MS-DOS, FreeDOS, OS/2, Microsoft Windows, ReactOS, and related operating systems for copying multiple files or entire directory trees from one directory to another and for copying files across a network.XCOPY stands for extended copy, and was created as a more functional file copying utility than the copy command found in these operating ...
