A web search engine is a software system that is designed to search for information on the World Wide Web. The search results are generally presented in a line of results, often referred to as search engine results pages (SERPs). The information may be a mix of web pages, images, videos, infographics, articles, research papers and other types of files.

A jet engine is a type of reaction engine discharging a fast-moving jet that generates thrust by jet propulsion. This broad definition includes airbreathing jet engines (turbojets, turbofans, ramjets, and pulse jets). In general, jet engines are combustion engines. Common parlance applies the term jet engine more narrowly, referring to various airbreathing jet engine, a type of reaction engine.

Aerospace engineers. These engineers design, construct, and test aircraft, missiles, and spacecraft. In their designs, aerospace engineers must consider each environment's limitations. For example, because jet engines don't work in space, where there is no air to push, aerospace engineers instead use rockets, which use liquid oxygen and propellant to build thrust.
