Big data is a term used to refer to data sets that are too large or complex for traditional data-processing application software to adequately deal with. Data with many cases (rows) offer greater statistical power, while data with higher complexity (more attributes or columns) may lead to a higher false discovery rate. Big data challenges include capturing data, data storage, data analysis ...

The incremental learning derives its name from the incremental nature of the learning process. In incremental  
learning, all facets of knowledge receive a regular treatment, and there is a regular inflow of new knowledge  
that builds upon the past knowledge.
